

Introducing Our Home Energy Efficiency Program!

NW Center for Sustainability and Innovation

We need to respond to the energy crisis with smart, innovative solutions. Our nonprofit organization is here to help!

- ⇒ Are you concerned about the energy your home consumes?
- ⇒ Are you concerned with the price of energy, both today and as prices go up?
- ⇒ Are you concerned about climate change?
- ⇒ Do you want your home to be as healthy and comfortable as possible?

What we do:

- Introduce you to an energy efficiency expert who will conduct a thorough assessment of your home;
- Provide you with a comprehensive menu of energy-saving measures to help lower your bills;
- Help you create a game plan to implement energy-saving improvements that pay for themselves as soon as possible;
- Facilitate work with contractors who are among the most knowledgeable in our region on energy efficiency and green building;
- Assist you in finding discounts and financing, and work within your budget;
- Help you track results and succeed!

Please call or write for more info about this ground-breaking program!
